

Exercise # 4

The objective of this exercise is to understand CSS layouts and box models

Instructions

Create a single page web page using the HTML + CSS tags you learned in class. Use the mockup below to create a replica of this mockup.

Failure to follow any single requirement item will result in partial credit.

Core Requirements:

1. Use sublime text to markup your page, use the **W3C validator** to check your work.
 - a. **You will lose at least 2 points** if your HTML is not valid and if all errors are NOT taken care of before submitting
 2. Save your page as excercise_4_YOURFIRSTANDLASTNAME.html and upload it to your existing github repo. Submit the link to your webpage NOT the url to the repo.
 3. Your style sheet should be an external style sheet (in the same folder as your html file)
-

Exercise Requirements:

4. All elements inside the parent element (containing element) should have a padding of 5px and a margin of 6px
5. The list in the right side box should have its bullets as squares
6. All elements must have the following:
 - a. Font family: Arial, Verdana, sans-serif
 - b. Font size: 12px
 - c. Font color: black
7. All boxes in gray should have a background of #eee (Hex color code)
8. Image should follow the same rules as previous exercise (caption, alt, title)
9. Click me button should link to hofstra.edu (open in a new tab) - when hovering over this button: text should turn black and the border 1px solid black, background should be white
10. Coming soon Div should be hidden and NOT visible to the end user
11. The footer box should be 200px in height and the content within should be scrollable
